PERMISSION TO USE

In presenting this thesis in partial requirement for a post graduate degree from university Utara Malaysia, I agree that University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, and whole or in part, for scholarly purpose may be granted by my supervisor or, in their absence by the Dean College of Business. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and the university Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Request of permission to copy or to make other use of material in this thesis, in whole or in part should be addressed to:

Dean of College of Business

ABSTRACT

The purpose of this research is to examine the relationship between job satisfaction and turnover intention among sales representative workers, also to identify whether there is dominant dimension of job satisfaction that has higher effect than other dimensions related to turnover intention, moreover to determine if there is significant difference of demographic characteristics.

The research done by mean of survey, a questionnaire was distributed to 200 randomly selected respondents. The data was analyzed by using SPSS version 12.

The findings indicate that there is significant negative relationship between the five dimensions of job satisfaction and turnover intention. Pay satisfaction is the dominant dimension that has the highest influence on turnover intention. It was found that gender, number of working years and education level have significant differences, while age and salary have not significant differences with turnover intention.

ACKNOWLEDGMENT

I thank and praise God S.W.T first and foremost for giving me the opportunity to get the Master degree, and give me the strength to complete this project paper effectively.

I would thank Dr. Fais Ahmad for his effortless support and his great help in various ways, and also for his time in counseling and follow-up, without his assistance and collaboration I couldn't complete this project paper until the end.

I would thank Dr. Ghazali Din for his cooperation in the assessment and for his time.

And of course extend my sincere thanks to my father and my mother for the encouragement and constant input in until I got my Master degree, and I thank my brothers and sisters for their assistance.

I thank my dear husband for providing me the chance to join the post graduate program from the beginning, and for his great assistance and big support, also for creating an appropriate atmosphere for me to complete this project paper until the end.

CHAPTER ONE

INTRODUCTION

1.1 Introduction

A number of authors argue that the importance of human resource issues and practices have been elevated recently by product/service markets and systemic changes in firms' labor. Therefore, more exploration perspective on human resource management has been adopted by practitioners and researchers (Preffer, 1979).

Technical innovations in practices have been concentrated by researchers in the HR area, focusing on the effects of training, selection, rewards, and appraisal on individual-level outcomes of job satisfaction or turnover. Further, these sub-discipline innovations have occurred in relative isolation from one another (Wright & McMahan, 1992). It is concerned with how organizational characteristics shape HR practices and priorities and how these HR practices contribute to the bottom line (Martell & Carroll, 1995).

1.2 Background of the Study

Subsequent organizational success and labor productivity are significantly affected by employee turnover, and that's why it has been one of the most commonly studied areas of interest. Voluntary turnover is a key unwanted consequence, and cost of change. So it is important to assess and understand avoidable turnover. Turnover intentions are the thoughts of the employee
